Dark matter in the halo
ρ_χ, $f_\chi(\mathbf{v})$, $\eta(v_{\min})$
Sects. 1.2, 1.3
Interaction
$\bar{\sigma}_e$, $F_{\mathrm{DM}}(q)$; absorption couplings
Sect. 1.4; Chaps. 2, 8
Target response
rate for each transfer (q, ω)
Chaps. 3-7
Energy deposit
ω in electron-hole pairs, phonons, quasiparticles, magnons
Chaps. 4-7
theory
Quanta
N_{eh} pairs (3.6-3.75 eV each in Si); athermal phonons; quasiparticles ($2\Delta_{\mathrm{BCS}} < 1$ meV in Al); photons
Chaps. 18-20
Sensor
charge amplifier, transition-edge sensor, kinetic-inductance detector, photon detector
Chap. 20
Events and limit
counts in an exposure; $\bar{\sigma}_e$ limit
Sect. 1.5; Chap. 21
detector: calibrated and measured
