Born-Oppenheimer crystal
clamped-nucleus bands; harmonic phonons
Chaps. 3-5
restore the derivative coupling
Nonadiabatic coupling
derivative coupling; adiabatic and sudden limits
Sect. 6.1
sudden limit
Migdal effect
electrons left behind by a kicked nucleus
Chap. 12
first order in the displacement
Electron-phonon matrix elements
screened vertex g; deformation potentials; Fröhlich vertex
Sect. 6.2
second order in g, electron line
second order in g, phonon line
Electron self-energy
Fan-Migdal, Allen-Heine; zero-point shift; lifetimes
Sect. 6.3
Phonon self-energy
electron bubble; linewidth; Eliashberg function
Sect. 6.4
add the optical vertex
Phonon-assisted absorption
indirect edge; Hall-Bardeen-Blatt edge; dark matter
Sect. 6.5
dark matter in place of the photon
Phonon-assisted electron recoil
the electrons kicked while a phonon carries momentum
Chap. 13
