linear range of the formula, $T_d \geq 2.5E_d$
screened cross-section, $E_d = 36$ eV
screened cross-section, $E_d = 12.5$ eV
power law $d\sigma \propto T^{-4/3}dT$
hard spheres (Kinchin–Pease)
NRT formula
$2E_dN_{FP}/T_d$
damage energy T_d/E_d
